U.S. EPA, REGION V
WASTE MANAGEMENT DIVISION
OFFICE OF THE DIRECTOR

Re: Waste-As-Fuel Notification
Requirements for Generators,
Marketers and Burners.
Letter of Warning.

This letter is to notify you that the United States Environmental Protection Agency (U.S. EPA) believes that you may be regulated under the Resource Conservation and Recovery Act (RCRA) because of new waste-as-fuel regulations finalized on November 29, 1985. These regulations are discussed in the Federal Register of November 29, 1985, and are codified in 40 Code of Federal Regulations (CFR) Part 266, Subparts D and E. These regulations apply to: (1) persons who generate hazardous waste that is used to produce a fuel, (2) persons who generate, transport, store, market or burn hazardous waste fuel, and (3) persons who market or burn off-specification used-oil fuel in utility boilers, industrial boilers or furnaces for energy recovery. These persons previously qualified for a recycling exemption under RCRA and were not required to notify the U.S. EPA. New regulations removed this exemption and required generators, marketers and burners to notify the U.S. EPA of their waste-as-fuel activities by January 29, 1986.

Please review the first few pages of the enclosed booklet, and within 30 days of this letter's date, submit a completed Notification of Hazardous Waste Activity Form, if applicable. If you do not believe you are a generator, marketer or burner required to notify, please sign the certification below and return this letter to the U.S. EPA. Signing the certification and returning this letter will remove you from the U.S. EPA regulated facilities list. Failure to respond within the required period may result in additional enforcement action.

If you store hazardous waste fuel prior to marketing or burning for energy recovery, you are also regulated under other provisions of RCRA and are required to submit an application for a hazardous waste permit.

All responses should be sent to Ms. Shirlee Brauer, U.S. EPA Region V, RCRA Enforcement Section, 5HE-12, 230 South Dearborn Street, Chicago, Illinois 60604. Questions may be directed to the RCRA/Superfund Hotline at (800) 424-9346 or to either Ms. Brauer at (312) 886-4591 or Ms. Laura Lodisio at (312) 886-7090.

Sincerely,

Basil G. Constantelos, Director
Waste Management Division

Enclosure

After reviewing the information provided, I certify that I am not a marketer or burner of waste-as-fuel and that I do not generate hazardous waste used to produce a fuel. Therefore, I am not subject to the regulations finalized on November 29, 1985, which are codified in 40 CFR Part 266, Subparts D and E. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

MID 086147913

Dear Sir:

We are writing this letter to inform you that Michigan Petroleum Company has been dormant and, therefore, has received no incoming waste oil of any kind since 1985. Even prior to that, it was involved in non-hazardous waste oil with no hazardous ingredients.

Please mark your records accordingly.

Very truly yours,

Roger B. Piceu

RE: Withdrawal of Part A (Non-Hazardous Waste)
FACILITY NAME: Michigan Petroleum Company
U.S. EPA ID NO.: MID086147915

Dear Mr. Piceu:

This is to acknowledge that the United States Environmental Protection Agency (U.S. EPA) has completed its review of your Part A Hazardous Permit Application and your letter of March 29, 1984, requesting the withdrawal of your permit application. According to the information which you have submitted, the wastes which are treated, stored or disposed at your facility are not defined as a hazardous waste in 40 CFR 261.3. It is the opinion of this office, based on the information submitted, that your facility is not required to have a hazardous waste permit under Section 3005 of the Resource Conservation and Recovery Act, at this time. Please be advised that you must still comply with any applicable State and local requirements.

You will retain your U.S. EPA Identification number, if you notified that the facility is a generator or transporter of a hazardous waste.

Please contact the Regulatory, Analysis and Information Unit at (312) 886-6148, for assistance, if you have any questions. Please refer to "Withdrawal of Part A (Non-Hazardous Waste)," in all correspondence on this matter.

Sincerely yours,

Karl J. Klepitsch, Jr., Chief
Waste Management Branch

Gentlemen:

We are in receipt of letter addressed to Robert Nelson, who no longer is in our employment.

I believe all the paper work enclosed is what you should have received by May 25, 1983. All the papers were dated and all was done in accordance of the inspector Marta Fisher of the EPA office. Why all this was not mailed to you, I do not understand. When I discovered all these, I am putting them in the mail.

If there is anything else that is requested or needed please contact me as soon as possible.

I am sorry about the above papers, they were all done during that period of time and should have reached you then. I am sure Marta Fisher could verify this.

Thank you.

Very truly yours,

RE: Michigan Petroleum Company
EPA I.D No. MID 086 147 915
13650 Helen Avenue
Detroit, Michigan 48185

Dear Mr. Nelson:

In a letter dated March 25, 1983, the United States Environmental Protection Agency Region V, requested you to submit additional information to support your request for withdrawal of your Part A hazardous waste permit application. A response to our letter was due on May 25, 1983. Since we have not yet received the additional information requested, our records will continue to show Michigan Petroleum Company as a regulated hazardous waste management facility subject to the Resource Conservation and Recovery Act, as amended (RCRA), and regulations promulgated thereunder.

Federal regulations (40 CFR Part 265, Subpart H) require that existing hazardous waste management facilities were to have submitted proof of financial assurance for closure by July 6, 1982, and liability coverage by July 15, 1982 (40 CFR Part 265.143 and 265.147, respectively). To date, this office has not received any financial instruments from the above-referenced facility; consequently, the facility is in violation of the financial requirements of 40 CFR Part 265, Subpart H. These financial responsibility requirements are a significant part of the hazardous waste management regulations.

Failure to submit the required financial instruments or documentation within fifteen (15) days of receipt of this notice may subject the above-referenced facility to enforcement action. RCRA provides for civil penalties up to \$25,000 per day per violation. Please forward the necessary financial instruments or documentation to:

It is possible that EPA will receive public requests for release of the information obtained during inspection of the facility above. Such requests will be handled by EPA in accordance with provisions of the Freedom of Information Act (FOIA), 5 U.S.C. 552; EPA regulations issued thereunder, 40 CFR Part 2; and the Toxic Substances Control Act, Section 14. EPA is required to make inspection data available in response to FOIA requests unless the Administrator of the Agency determines that the data contains information entitled to confidential treatment.

Any or all the information collected by EPA during the inspection may be claimed confidential if it relates to trade secrets or commercial or financial matters that you consider to be confidential. If you make claims of confidentiality, EPA will disclose the information only to the extent, and by means of the procedures, set forth in the regulations (cited above) governing EPA's treatment of confidential information. Among other things, the regulations require that EPA notify you in advance of publicly disclosing any information you have claimed and certified confidential.

To Claim Confidential Information

To claim information confidential, you must certify that each claimed item meets all of the following criteria:

1. Your company has taken measures to protect the confidentiality of the information, and it intends to continue to take such measures.
2. The information is not, and has not been, reasonably obtainable without your company's consent by other persons (other than governmental bodies) by use of legitimate means (other than discovery based on a showing of special need in a judicial or quasi-judicial proceeding).

3. The information is not publicly available elsewhere.

4. Disclosure of the information would cause substantial harm to your company's competitive position.

At the completion of the inspection, you will be given a receipt for all documents, samples, and other materials collected. At that time, you may make claims that some or all of the information is confidential and meets the four criteria listed above.

If you are not authorized by your company to make confidentiality claims, this notice will be sent by certified mail, along with the receipt for documents, samples, and other materials to the Chief Executive Officer of your firm within two days of this date. The Chief Executive Officer must return a statement specifying any information which should receive confidential treatment.

The statement from the Chief Executive Officer should be addressed to: Paul Meriage

U.S. EPA 5HT-TUB
Toxic Materials Branch
230 S. Dearborn
Chicago, IL 60604

and mailed by registered, return-receipt-requested mail within seven (7) calendar days of receipt of this Notice.

Failure by your firm to submit a written request that information be treated as confidential, either at the completion of the inspection or by the Chief Executive Officer within the seven-day period, will be treated by EPA as a waiver by your company of any claims for confidentiality regarding the inspection data.

To be completed by facility official receiving this notice

RE: Request for Information--Hazardous Waste
Permit Review (Non-Hazardous Waste)

FACILITY NAME: Michigan Petroleum Company
USEPA ID NO.: HFD 036 147 915

Dear Mr. Nelson:

This letter serves to acknowledge that the United States Environmental Protection Agency (USEPA) has processed your Part A Hazardous Waste Permit Application. Our review indicates your facility may not require a permit under §3005 of the Resource Conservation and Recovery Act as amended, (RCRA); however, further clarification is needed.

Based on the information submitted, your facility appears to treat, store, or dispose of a non-hazardous waste. Wastes which exhibit characteristics of ignitability, corrosivity, reactivity, or EP toxicity, as defined in 40 CFR Part 261 Subpart C, or which are listed in 40 CFR Part 261 Subpart D, remain subject to regulation under RCRA.

Please reexamine your wastes pursuant to 40 CFR Part 262.11 (enclosed), and submit a revised Part A application to the Regional Office within 60 days, if your waste is hazardous and regulated. If you find that your waste is not regulated, please withdraw your permit application. Your written withdrawal request, with a detailed explanation, must be signed and certified by an authorized person, in accordance with 40 CFR Part 122.6 (enclosed). Withdrawal of the permit application will eliminate further mandated permit processing procedures. Unless we receive a reply within 60 days, we will assume that your waste is regulated, and that your facility is subject to the interim status standards, including the financial responsibility and Part B permit requirements.

Please contact the Technical, Permits, and Compliance Section at (312) 353-2197, for additional information and copies of blank Part A applications. Please refer to "Part A Application--Non-Hazardous Waste," in all telephone contacts and correspondence on this matter.

Sincerely yours,

Karl J. Klepitsch, Jr.

Robert Nelson, Plant Manager
Michigan Petroleum Company
13650 Helen Avenue
Detroit, Michigan 48186

RE: Michigan Petroleum Company
EPA I.D. No. 010 026 147 915
13650 Helen Avenue
Detroit, Michigan 48186

Dear Mr. Nelson:

In a letter dated March 25, 1983, the United States Environmental Protection Agency Region V, requested you to submit additional information to support your request for withdrawal of your Part A hazardous waste permit application. A response to our letter was due on May 25, 1983. Since we have not yet received the additional information requested, our records will continue to show Michigan Petroleum Company as a regulated hazardous waste management facility subject to the Resource Conservation and Recovery Act, as amended (RCRA), and regulations promulgated thereunder.

Federal regulations (40 CFR Part 265, Subpart H) require that existing hazardous waste management facilities were to have submitted proof of financial assurance for closure by July 6, 1982, and liability coverage by July 15, 1982 (40 CFR Part 265.143 and 265.147, respectively). To date, this office has not received any financial instruments from the above-referenced facility; consequently, the facility is in violation of the financial requirements of 40 CFR Part 265, Subpart H. These financial responsibility requirements are a significant part of the hazardous waste management regulations.

Failure to submit the required financial instruments or documentation within fifteen (15) days of receipt of this notice may subject the above-referenced facility to enforcement action. RCRA provides for civil penalties up to \$25,000 per day per violation. Please forward the necessary financial instruments or documentation to:

ACKNOWLEDGEMENT OF NOTIFICATION OF HAZARDOUS WASTE ACTIVITY (VERIFICATION)

This is to acknowledge that you have filed a Notification of Hazardous Waste Activity for the installation located at the address shown in the box below to comply with Section 3010 of the Resource Conservation and Recovery Act (RCRA). Your EPA Identification Number for that installation appears in the box below. The EPA Identification Number must be included on all shipping manifests for transporting hazardous wastes; on all Annual Reports that generators of hazardous waste, and owners and operators of hazardous waste treatment, storage and disposal facilities must file with EPA; on all applications for a Federal Hazardous Waste Permit; and other hazardous waste management reports and documents required under Subtitle C of RCRA.
